# Human-Computer Interaction

# Minority Report

# Iron Man

A man with glasses and a grey shirt is shown from the side, interacting with a large-scale digital interface on a table. The interface consists of a grid of small, square elements, some of which are illuminated. A small green light is visible on the table surface near the interface. The background is dark.

# iForm [Leithinger 2013]

We present «LazyNav» a tool to evaluate interaction techniques for ground navigation in 3D scenes.

International Collegiate Soccer Competition (ICSC) is famous for its well-kept rectangular stadiums. The grass playing fields in ICSC stadiums are always 100 meters long, and 75 meters wide. The grass is mowed every week with special lawn mowers, always using the same strategy: first, they make a series of passes along the length of the field, and then they do the same along the width of the field. All passes are straight lines, parallel to the sides of the field.

**Keyboard shortcuts**

A custom-built keyboard is shown from a top-down perspective. It features a grey frame and white keycaps. The keyboard is partially assembled, with some keycaps missing, revealing the internal mechanical components. A black cable is connected to the back of the keyboard. In the background, there is a breadboard with various electronic components, including resistors and integrated circuits, connected by jumper wires. The entire setup is on a light-colored wooden surface.

**Curve** [Wimmer et al. 2010]

A person's hands are shown interacting with a large digital screen. The left hand is pointing at a specific area on the screen, while the right hand is positioned nearby. The screen displays a document layout with various text blocks and a small image. The person is wearing a dark-colored shirt. The overall scene suggests a collaborative or individual digital workspace.

# DigitalDesk [Wellner 1993]

**Digital pen**

A side-view photograph of a man with short brown hair and a beard, wearing a black t-shirt and dark pants. He is sitting on a blue ergonomic office chair at a white desk. He is looking down at a laptop on the desk, with his right hand on the trackpad. To his left is a large black computer monitor on a stand, and next to it is a small green potted plant with long, thin leaves. The background is a plain white wall with a window frame visible on the right. A semi-transparent dark grey banner is at the bottom of the image, containing the text 'Chair Gestures [Probst 2014]'.

**LivingDesktop** [Bailly et al. 2016]

The image shows a computer workstation on a light-colored wooden desk. A silver Dell monitor is positioned in the background, displaying a web browser with a Google search page. In front of the monitor is a black keyboard with a blue wrist rest and a red and black computer mouse. A custom-built robotic arm, consisting of a metal track with a sliding carriage, is mounted on the desk. The carriage holds a small electronic device, possibly a microcontroller or sensor. A red C-clamp is visible on the right edge of the desk, securing the track. The background is a plain white wall.
